Professional Summary

Dynamic Technical Operations and Delivery Leader with 10+ years of software engineering experience combined with over 4 years of strategic project execution and operational management. Proven track record of architecting scalable operating rhythms, untangling cross-functional bottlenecks, and designing custom internal dashboards to ensure absolute project visibility. A pragmatic operator who bridges the gap between deep engineering realities and executive business strategy to streamline delivery pipelines and accelerate revenue-generating tech deployments

Professional Experience

Account Manager | Investments PMi

Nov 2025 – Jan 2026

- Coordinated across support, product, and engineering teams to resolve client issues and improve customer satisfaction.
- Created training materials and operational runbooks to standardise responses and escalation handling.
- Managed SLA commitments and stakeholder communication throughout issue resolution.

Project Manager | FutureFirst Foundation

Oct 2023 – Aug 2025

- Designed and implemented onboarding features to improve user activation.
- Translated user needs into technical requirements and delivery priorities.
- Integrated analytics dashboards to monitor adoption and support UX improvements.

Project Manager | PixelPlaque

Jan 2022 – Oct 2025

- Led product operations for a distributed open source contributor team.
- Tracked KPIs and operational reporting to monitor project health.
- Optimised workflows and resource allocation to improve delivery timelines.

Account Manager | Investments PMi

Jun 2022 – Feb 2023

- Led client onboarding and support while consistently meeting SLA targets.
- Identified cross sell opportunities during onboarding and maintained CRM data integrity.
- Built internal knowledge resources that reduced repeat enquiries.
